Relaxing warmth.

Feeling at home is priceless and cannot be bought. The warmth of a home is something we create with our nearest and dearest in the intimate settings of our homes. As for the warmth produced by heating, that is something we can prevent from escaping.

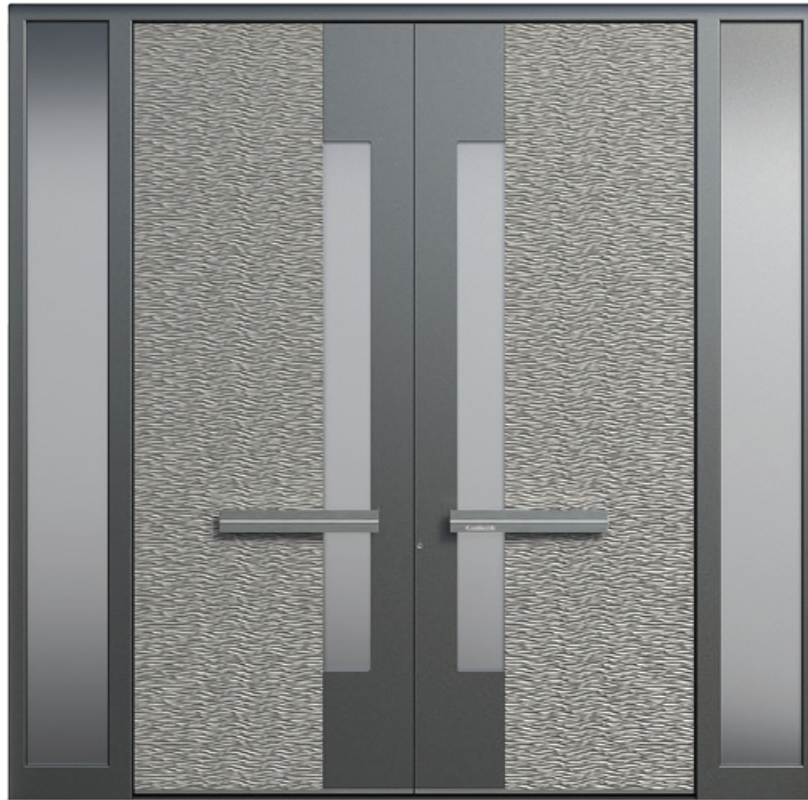

This is an area in which *Premium* can hardly be matched. Some of the best thermal insulation in the world with a thermal conductivity coefficient of $0.67\text{W/m}^2\text{K}$ results from carefully selected materials and impressive thickness. *Premium* entrances will never let you down. They will keep your home warm on the inside and elegant and admired on the outside. Which is the least someone like you deserves.

Grande. For the grand.

SOMETIMES SIZE DOES MATTER.

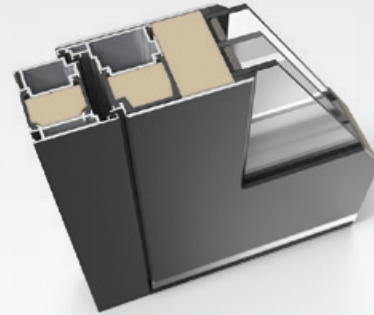

Spacious rooms with high ceilings, majestic villas, castles and masterpieces of modern architecture cannot be fitted with a run-of-the-mill entrance. And some simply refuse to have a regular-sized entrance. *Premium* entrances can be produced as Grande entrances, measuring up to 300 cm in height and 280 cm in width. Along with side elements, they create an impression of breath-taking grandeur.

Grande is a world of unparalleled elegance. It is an entrance for spaces and people that are larger than life. When size matters, choose *Premium* Grande.

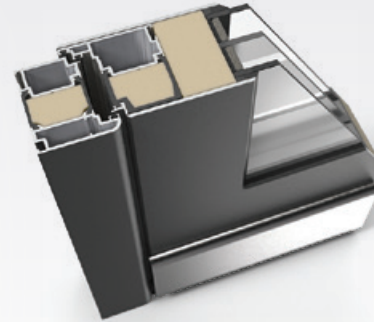

ALUMINIUM PREMIUM CARBON

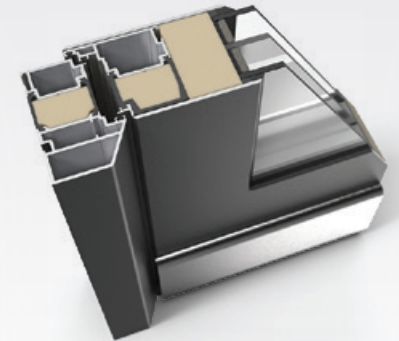

A safe, extremely rigid and excellently insulated aluminium construction, reinforced with a carbon fibre profile. The double-sided monoblock construction allows the creation of the most beautiful shapes.

LEVEL

CONTOUR

ALU-WOOD PREMIUM

An extremely rigid safety construction made out of solid wood, reinforced with a steel profile. The external side is covered by aluminium, which ensures increased durability and does not require any maintenance. Excellent insulation is provided by the triple sealing of the door frame and leaf, the threefold thermal insulation glazing and the thermal threshold.

AFRICAN MYSTERY MATTE

A wonderful black and copper stripes pattern on fine matte glass.

IVORY GLOSS

A sophisticated ivory coloured surface on glossy clear glass.

Glass cover

Exquisite glass cover; both aesthetically perfected and highly resistant to scratches.

Handles and illumination

Handles are the most personal part of the door. Every resident touches it at least a thousand times a year; therefore, we pay special attention to them. We select one of the basic forms, either round or angular, and determine the exact length choosing from 750 mm, 950 mm, 1150 mm, 1350 mm, 1500 mm, 1700 mm or 1800 mm. To ensure the best impression and a personal touch, we have created several series of unique illumination upgrades of handles that use patented technology and that were awarded the prestigious international German Design Award Special 2019.

For more information about the entire range of handles and illumination upgrades, please contact the sales department.

LUX

Soft ambient illumination of the doorhandle or handle, lighting up the whole facade, evokes a feeling of magical beauty, safety and warm homeliness.

Safety and comfort

Premium provides a safe and carefree entrance to your home. A sturdy and reliable multilayer structure and a multi-point security lock with solid hooks will drive away any would-be burglar. Door entrances can be upgraded to a version certified against burglary with resistance class 2 (wk2) specifications. It may be hard to believe that such a robust structure of resistant materials can be so easy on the eye and elegant, but *Premium* entrances make that possible.

ARMO

The ARMO locking system is the basic standard of the *Premium* collection. Manual locking will trigger two solid hooks firmly fixing the door to the frame. It contains a safety cylinder that acts on both sides, as well as 5 keys. Each cylindrical lock can be upgraded to contain a knob on the interior side of the door.

BURGLARY RESISTANT

IFT ROSENHEIM

Several upgrades to safety and comfort are available.

ARMO COMFORT

The COMFORT version offers a new dimension of comfort that prevents you from locking yourself out without a key. Every time you close the door, a mechanical lock with two solid hooks is automatically activated. It can also be set against self-locking, thus allowing you to open the door comfortably from the outside just by pushing it.

ARMO COMFORT ELECTRO WITH A FINGERPRINT SCANNER

A high degree of comfort with unsurpassed safety. ELECTRO upgrade to the system. ARMO COMFORT provides a convenient connection with remote unlocking systems and fingerprint scanners. This means carefree motorised unlocking without a key, automatic mechanical locking, a variety of settings and functions, maximum security upon an open lock closure, and a prolonged product lifespan. The cutting-edge SECURO intelligent scanner can identify changes in members of the household, such as the growth of children's fingers and minor injuries.

For more information about the entire range of safety and comfort upgrades, please contact the sales department.
